

On December 3rd, Adam Austin (Totem Technologies) will present a webinar titled “Federal Contractors’ Evolving Cybersecurity Requirements.” We know that the CMMC is going to be a mandatory element for anyone who wants to work with the Department of Defense. Knowing what is required and needed for your company is as important as knowing your proprietary and confidential information is safe from unscrupulous hackers or inadvertent mishaps. In this webinar, you will learn about the different cybersecurity requirements for DoD contractors, what they mean, and much more.

As a client of the ND PTAC, you can attend this webinar at no cost to you. If you are interested in this subject, check out the details below and register today!

### **Federal Contractors’ Evolving Cybersecurity Requirements**
